Why I Became An Elder Care Attorney

I am an elder care and estate planning attorney because of my grandparents. I was young and in school when they each went through their illnesses. I saw what my parents, aunts and uncles did to help and it wasn't easy for them or my grandparents.

My fond memories are clear but there is an emotion tied to their aging and caregiving issues that has inspired me and fueled a motivation to help other families, parents and grandparents. I wanted to help them – people of their generation, in their stage of life – older folks and grandparents. I wanted to help the families that loved their parents and grandparents and aunts and uncles, just like I loved mine. I wanted to help them every day in my work and use my talents to help them live better lives, especially towards the end of their lives when they were planning for or needed the most help.

I established Tully Law Group to help other families sort through some of the most trying times they will ever experience.
